HUMAN-COMPUTER INTERACTION 1

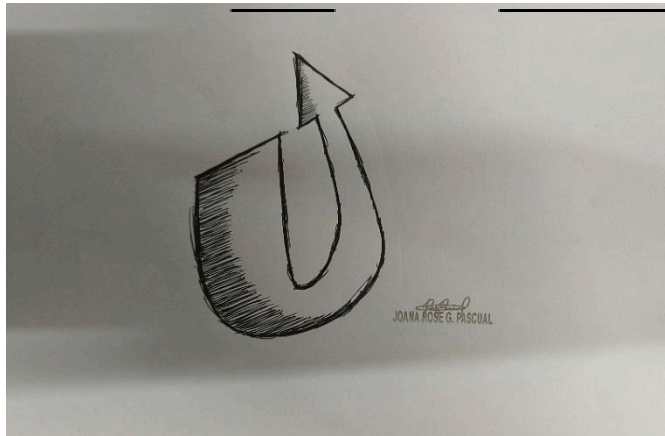

SCORE

2nd Semester SY 2025-2026

Name: Christian Payapaya Agoo

Date: 01/16/2026

Course and Year: BSIT 1 Section:
HUMCOM IDA6

1. Traditional vs. Digital Transition: What were the primary challenges you encountered when translating your Hand-drawn sketch into a digital format? How did the digital tools you chose help or hinder the original "feel" of your brand trademark?

The challenges creating a traditional vs digital was designs available on specific application when creating a digital design vs traditional wherein you have the freedom to create ideas

2. Cultural and Personal Identity: How does your chosen color palette and symbolism reflect your personal identity or the specific "message" of your website? Why is it important for a web designer to establish a consistent trademark before beginning the coding phase?

The color palette and symbolism used to create the logo was a personal choice. The U means "UPLEAD" which is the company name the symbol arrow mean "UP and LEAD" wherein the companies' vision is to lead

3. Technical Tool Evaluation: Among the digital editing tools you identified in your documentation, which one was the most essential for achieving professional-looking results? If you were to redo this activity, what other software or feature would you explore to improve the quality of your output?

If I were to recreate the logo on a specific tool I prefer using the Adobe Applications wherein it offers a lot of design and it's designed for Graphic Artists and other professionals
