

SCHOOL OF INFORMATION TECHNOLOGY
Instructional Material (Laboratory)

HUMAN-COMPUTER INTERACTION1
(HUMCOM1)

Topic(s):	Introduction to HTML and Basic Web Structure					
Laboratory Activity No.	02			No. of Hours:	30 minutes	
Start Date:	JANUARY 16, 2026			Due Date:	JANUARY 16, 2026	
Approach:	☒	Individual	☐	Group		
	☐	Online	☐	Onsite	☐	Hybrid
Name(s): Lastname, First Name Arranged in alphabetical order	Agoo, Christian Payapaya					

I. Prerequisites

- Students should have:
- a. Familiarity with a basic text editor (Visual Studio Code, Notepad++, or Notepad).
 - b. Knowledge of how to create and save files with specific file extensions (.html).
 - c. A basic understanding of the purpose of a web browser (Chrome, Firefox, or Edge).

II. Learning Objective

At the end of this laboratory activity, the student must have created a functional, well-structured HTML webpage titled "All About Me." The output must demonstrate the student's ability to use essential HTML tags and display formatted text content accurately within a web browser.

At the end of this laboratory activity, the student must be able to:

Learning Objectives	Aligned Course Learning Outcomes (CLOs)
1. Implement the standard HTML5 document structure (<code><!DOCTYPE html></code> , <code><html></code> , <code><head></code> , <code><body></code>).	CLO 1
2. Use heading (<code><h1></code>) and paragraph (<code><p></code>) tags to organize personal information.	CLO 1
3. Successfully save and execute an HTML file in a web browser.	CLO 2

III. Setup and Procedure

- Mandatory
- Software Environment:
- Visual Studio Code, Notepad++, or Notepad

Hardware Environment

- PC/workstation

IV. Problem/Procedure

Annex A for the problem description.
Annex B for the detailed procedure.

V. Additional Instructions

- a. Filename (HTML): Activity1_Home_[YourLastName].html
- b. Submission: Submit the final .html file to the designated laboratory drive or as instructed by the faculty.
- c. Plagiarism Policy: Anyone that has a similar output to another student will be marked zero. SIT-FO-045 Page

VI. Rubric/Scoring Guide

Criteria	5 Points (Excellent)	3 Points (Good)	1 Point (Needs Improvement)
Content & Originality	Content is clear, relevant, and unique. Personal quotation is included.	Content is somewhat clear but lacks detail or is slightly generic.	Content is unclear, irrelevant, or highly similar to others (0 pts).
Structure & Composition	Elements (h1, p) are well-arranged with a logical hierarchy and no nesting errors.	Elements are okay, but the visual hierarchy or tag nesting is slightly off.	Elements are poorly arranged, making the page hard to read.
Technical Tool Usage	Perfect use of HTML boilerplate and tags. Code is clean and indented.	Basic use of tags; minor syntax errors or missing document type.	Tools used incorrectly; significant tags are missing or broken.
Saving Requirements	File saved correctly as .html with the required naming convention.	File format is correct, but naming convention was not followed.	Incorrect saving format or file is missing/unreadable.
TOTAL			___ / 20 Points

VII. Reflection

In this section, you will write a brief reflection on your learning. Answer the following guide questions:

1. What was the most challenging part of using the basic HTML tags like headings and paragraphs?

The most challenging part of using basic HTML tags is often understanding the hierarchy and structure of the content. For example:

1. *Knowing when to use <h1> vs <h2> vs <h3> to organize headings properly.*
2. *Ensuring paragraphs <p> don't run together and that text is readable and well-spaced.*
3. *Keeping your code clean and consistent, so it's easy to maintain as your page grows.*
4. *Avoiding mistakes like forgetting closing tags (</p> or </h1>), which can break the layout or cause unexpected formatting*

2. How do you think a simple, well-structured webpage can improve the way personal information is presented online?

*A simple, well-structured webpage makes personal information **clear, organized, and easy to read**, which has several benefits:*

1. *Clarity: Readers can quickly find important details like name, contact info, or biography.*
2. *Professionalism: Clean formatting with headings and paragraphs makes you look more credible.*

3. *Accessibility: Structured pages are easier for screen readers or search engines to understand.*
4. *Flow: Information is presented in a logical order, so visitors don't get lost or overwhelmed.*
5. *Aesthetic appeal: A minimal, well-spaced layout is visually appealing and reduces distraction.*

ANNEX A
Problem

Instructions: You are tasked to create a simple webpage that introduces yourself. The page must be titled "All About Me" and must include a personal quotation as well as a brief biography including your name, age, location, school, major, and hobbies.

Constraints:

- You must use correct HTML tag nesting and indentation.
- The content must be original and personal.
- The activity must be completed within the 30-minute time frame.
- **Warning:** Anyone that has a similar output to another student will be marked zero. .

ANNEX B

Procedure

Procedure:

1. **Open Text Editor:** Launch your preferred text editor (e.g., VS Code or Notepad++).
2. **Document Setup:** Start your code with the `<!DOCTYPE html>` declaration and the opening `<html>` tag.
3. **Head Section:** Create the `<head>` section and include a `<title>` tag with the text "About Me".
4. **Body Content:** * Inside the `<body>` section, add an `<h1>` heading with the text "All About Me".
 - o Use `<p>` tags to write your information: Name, Age, City, School, Major, Interests, and Hobbies.
5. **Browser Preview:** Open your saved file in a web browser to ensure the layout

appears correctly.

Saving:

1. **Format:** Save the file as an HTML document (.html).
2. **Naming Convention:** Save the file as Activity2_Home_[YourLastName].html.

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <title>ALL ABOUT ME</title>
  <style>
```

```

        .round-image {
            width: 500px;
            height: 500px;
            border-radius: 70%;
            object-fit: cover;
        }

        .nav-links a {
            display: inline-block;
            margin: 20px;
            padding: 12px 24px;
            background-color: #333;
            color: #ffffff;
            text-decoration: none;
            border-radius: 6px;
            font-weight: bold;
        }

        .nav-links a:hover {
            background-color: #f00606;
        }

        body {
            text-align: center;
            padding: 40px;
        }

        p {
            max-width: 700px;
            margin: 15px auto;
            line-height: 1.6;
            color: #333;
        }
    </style>
</head>
<body>

<h1>All About Me</h1>

<h2><a href="#" class="z:\HUMCOM 2-5\Activity2_About
Me_Agoo.html,z:\HUMCOM 2-5\Activity4_About Me_Agoo.html"> Christian
Payapaya Agoo</a></h2>

<p> My name is <strong> Christian P. Agoo </strong>,
    and I am currently <strong> 27 </strong> years old living in the city
of <strong> Baguio </strong>.

    I am a dedicated working and a returning student at the <strong>
University of Baguio </strong> where I am pursuing my degree in <strong>
Bachelor of Science Major in information Technology </strong>.</p>

```

```
<p> Years ago, I enrolled for Bachelor of Science Major in Architecture at
the same school University of Baguio. Due to financial issues, I deicded
to stop and look for a job. Then years later I came with the enthusiasm
and mindset.<strong> To Graduate!</strong> </p>

<p>As a student, I strive to merge my personal interests with my
professional studies to create a unique learning experience. I am committed
to continous growth and looking forward to how these foundational
skills will shape my future career path.</p>
